

PACKED CONSTRUCTION GRAVEL & AGGREGATES

PACKED CONSTRUCTION GRAVEL & AGGREGATES

Full range of high quality aggregates for use in a wide variety of large and small building and construction applications. Manufactured to the highest standards and all CE marked.

Sizes available

(56 large poly bags per pallet)

To find out more about our range of PACKED PRODUCTS and the best solution for your project call **03444 63 64 65**

LIMESTONE

Available in 6mm, 10mm and 20mm grades for use as a concreting aggregate.

DUST GRANO 6MM

Grano (6mm - dust) for use in mixing with cement to make fine concrete. Place on top of a new concrete surface and polish for a tough finish.

GRAVEL

Manufactured specifically for building use and general construction work such as drainage and making concrete. Our gravel is available in 4 sizes 6mm, 10mm, 20mm and 40mm.

BALLAST

A mixture of sand and either 10mm or 20mm gravel commonly used in mixing coarse concrete. Can also be used in bedding drainage pipes and as a sub base.

CRUSHER RUN

A combination of crushed rock and stone dust to create a very low-void content sub base aggregate. Available in 20mm and 40mm

GRANITE

Pure crushed granite ranging in size from 2-6mm. Used for making concrete or as a bedding layer for block paving applications.

MOT TYPE 1

Crushed aggregate from 40mm to dust. Ideal as a sub-base for driveways and paths when compacted, with excellent load bearing properties.

RAIL TRACK BALLAST

Rail track ballast serves as a bed for rail tracks and provides the drainage and strength needed for heavy loads carried by trains.
